TYPHUS fever still rages unchecked among the poor and lowly Russian im migrants in New York city, and there i hardly any hope of chocking off this infectious disease before the return o warm weather. As soon as the tariff tinkers get around to it they will saddle it on the McKinley bill and howl louder

than ever for free trade.

THE lumbermen now in session at Washington are making themselves heard in congressional circles. They want a tariff against Canadian lumber. They cannot they claim, compete agains protected against her. The cotton grow ers of the south are equally as clamor ous for the continuance of protectiv rates on cotton and tobacco, but on oth er industries many of them are tariff tinkers and free trade howlers. No town on earth the size of Tucson is more in need of a society for the prevention of ernelty to animals than this city. To the horse, man is under con stant and lasting obligation, but not withstanding this plain fact he is the most abused animal on the face of th earth. The poor, sore-backed, collar galled, half-starved brutes that car daily beseen on the streets of Tucson are a disgrace to the better sentiments of our people. Surely the citizens of Tucson are none the less humane than thosof other cities where dumb' brutes arprotected against the inhumanity o their drivers. Some such organization should be established here. We have among us many humane men who trea their horses with almost the care and consideration of children, but again there are those who brutally flog their half-fed animals without provocation and it is this latter class that should be looked after. Yesterday a pair o wretched looking animals, too poor al most to walk, with the hair whipped from their backs, were seen slowly pull ing a heavy load through the mudd streets, while the brute of a driver continued to rain blows on the naked back: of the poor, defenseless animals, which shrunk under every lash, but were to weak to do more than slowly move the load. Such scenes are a disgrace to our civilization and should be stopped.

THE M'KINLEY BILL SUS-

TAINED. The supreme court has put the Me Kinley bill on the firm basis of consti tutionality. Of the many objections raised against its constitution validity but one appeared to The Inter Ocean at the time of their presentment to the pourt to have even an appearance of merit, and it is upon this one alone that the court was divided, though the majority held, as The Inter Ocean ex pected, against it.

The rulings of the supreme court are

1. That the omission of the tobacco rebate clause from the copy of the bil! signed by the president did not invali-

date the duty levving clauses. 2. That the sugar bounty clause does not invalidate the revenue feature of

3. That the reciprocity clause does not unconstitutionally delegate legisla-

tive power to the president. 4. That the speaker of the house of

representatives has power to count a quorum under the rules of the house. The Sentinel declines to sanction the proposed policy of demagogism and poltroonery."

IT is among the possibilities that one more territory at least may be admitted to statehood by the present congress. It is expected that bills for the admission of Arizona, probably New Mexico, and possibly Utah may be reported in the house. Advices from Washington indicate that reports in favor of the admission of Arizona and Oklahoma are lizely to be made in the senate, but that report in favor of the admission of New Mexico and Utah cannot be looked transit of Venus in 1882, puts it at 92,for in that body.
